EDUCATION

Lone Star College System Associates of Arts Business Field of Study GPA: 3.94/4.0

Prairie View A&M University (PVAMU)

Incoming (Class of 2028')

TECHNICAL SKILLS

Computer Programs:Lightroom, Microsoft Excel, and Word, Web Design

Programming Languages: Python, Web Design, Web Development Full-Stack, Javascript

Spoken Languages: Somali (Native language); Arabic, French, and English (proficient user)

EXPERIENCE

Wendy's Restaurant Company

August 2021 - March 2023

- Gained foundational understanding of operational workflows and supply chain logistics within a high-volume QSR environment.
- Learned the ins and outs of the fast-food industry, and tried to grow my job experience.
- Grew my Customer Service skills as a 16 year old at the time. It was really a foundation for passion in Business.

Web Design Freelancing

Summer, 2023 - Current

- Built a couple website using frameworks for clients throughout the summer of 2023 and currently
- Building on to doing bigger project code heavy websites for even bigger clients

Sir Abdisalam Tutor Program - Middle School English Tutor

January 1, 2022 - Current

- Implemented curriculum design and personalized learning strategies to improve student understanding in English.
- Established a pro-bono educational model to address access barriers, driving community engagement and educational equity.
- Plan to extend the tutoring program to High School Freshmen and Sophomores.

Verithia Research Group - Founder and CEO

Winter , 2023 - Summer, 2025

- Initiated a cutting-edge AI/LLM research group focused on developing proprietary, accessible educational technology for underserved global populations.
- Led the strategic development of a low-bandwidth, offline educational model to ensure global accessibility in resource-scarce regions.
- We are in the beginning stage of our research and plan to release a model in the near future.
- Developed expertise in **Team management**, **Data Science** principles, and **Operational Management** while founding and scaling the group.

Cengage Group - Marketing Internship

January 2025 - Present

- Supported key **corporate growth initiatives** for Cengage Group, a global education & technology company that reported \$1.54B in adjusted cash revenue in FY2024 (year ended March 31, 2024), focused on helping learners achieve education and career goals. ^[1]
- Represented Cengage on campus through tabling, classroom/student-organization outreach, and peer-to-peer marketing to increase awareness and usage of digital learning tools (e.g., MindTap/WebAssign where applicable).
- Partnered with faculty, advisors, and student org leaders to coordinate demos, answer questions about access/setup, and connect students to the right learning resources.
- Generated **market intelligence** by collecting and documenting student feedback and outreach outcomes, delivering **strategic reports** to program leadership for continuous improvement.

Lone Star College - Advising Department

April 2025 - April 2026

- Managed high-volume front-line operations for a 13,000+ student campus, triaging complex inquiries (walk-ins, calls, emails) to ensure seamless workflow management.
- Provided strategic advising on transfer pathways and core completion, directly contributing to the mitigation of credit loss for transferring students.
- Implemented process controls (ID verification, visit logging) and flow management techniques to maintain service quality and reduce student wait times.
- Leveraged data management platforms (Outlook, Excel, advising systems) for efficient case routing and systematic tracking of follow-up actions.
- Drove **operational efficiency** by creating **Excel-based systems** for activity tracking and **data reporting** within the Advising Department.

- Proactively call students to confirm appointments, share transfer next steps, and resolve advising questions; document outcomes and follow-ups in advising systems.

Lone Star College - Records Department

April 2026 - Present

- Front-facing role assisting students with admission issues, sorting and resolving inquiries, and ensuring streamlined processing.
- Moderated Webex/Zoom advising sessions, facilitating Q&A and guiding students through transfer steps and core completion.

LEADERSHIP & COMMUNITY SERVICE EXPERIENCE

Genius Terminal - *Instructor*

11th Grade - Current, 300 hours, June 2023- Current

- Designed and implemented an 8-week technical curriculum (C++ and Arduino) for 24 students, partnering with Mumineen Relief to deliver technical education.
- Led 4-week SAT Math preparation boot camps, targeting underserved communities to drive educational equity and academic achievement.

The SISU Foundation For Educational Development - Co - Founder and President

600 hours + , November 2021- Current

- Co-founded a non-profit dedicated to educational development for vulnerable populations, including strategic deployment in refugee camps.
- Managed the initial operational setup of three educational centers in East Africa, demonstrating rapid deployment and resource management skills.
- Directed the organization's expansion strategy into the United States, focusing on educational integration programs (English, Math, Science) for new immigrants.
- Authored a detailed **strategic business plan** for the transition to an **AI-based, wifi-less educational model**, focusing on long-term scalability and global access.

PROJECTS

Alen AI - Py torch, TensorFlow, Python

(February 2023)

- Developed a machine learning prototype using PyTorch and TensorFlow for automated, terminal-controlled smart home light management, demonstrating foundational skills in AI application and process automation.

Criteria (Formerly - Journalite) - React, TypeScript, Firebase, MongoDB, Redis (conceptual), REST APIs

(Jan 2024 - Present)

- Architected and developed a dynamic article-reading platform incorporating real-time features (likes, comments, reader presence), designed to enhance user engagement and collect behavioral data.
- Established a scalable frontend architecture using component-based design and API-driven data fetching, preparing the platform for high traffic and future growth initiatives.
- Check it out at journa.abdisalam.blog

Personal Website & Blog (abdisalam.blog) - HTML, CSS, JavaScript, Hugo, GitHub, Vercel, Figma

(April 2023)

- Managed and deployed a personal digital presence (website and blog) using Hugo and Vercel for technical, philosophical, and educational content, establishing a personal brand platform.
- Executed custom technical implementations (layouts, styling, and domain configuration with subdomains) to ensure professional digital asset management and consistent user experience.
- Check it out at abdisalam.blog

DevOps & Cloud Learning Lab - AWS/GCP (foundational), GitHub, CI/CD

(November 2025)

- Established test environments on AWS/GCP to explore cloud deployment strategies, version control, and CI/CD pipelines for improved software development lifecycle efficiency.

Investigated core infrastructure concepts (hosting, domains, environment configuration) relevant to operational continuity and system reliability.
